IN THE CLAIMS

Please amend claims 2 and 6-9, as follows:

3\ 2. (Amended) A method, comprising:

while power is being supplied to a processing unit, detecting whether a video display unit
is newly coupled to a connecting unit of said processing unit, said video display unit conveying
varying visual information to a user, and said processing unit processing data including the varying
visual information;

when said video display unit is detected as being newly coupled to said connecting unit while
power is being supplied to said processing unit, reading first data corresponding to said video display
unit;

determining whether said first data corresponds to second data stored in a memory unit;
when said first data does not correspond to said second data stored in said memory unit,
storing said first data in said memory unit and determining a resolution corresponding to said video
